

NOT A TRAIN
RUN YESTERDAY

A General Strike on the Chicago and Southeastern Railroad.

MEN ASKED FOR BACK PAY
Not Getting What They Want

They Quit Work.

MUCH RAILROAD PROPERTY DESTROYED
All Cabooses at Lebanon Burned.

Strikers Say It Was Not Their Work—The Company's Fault.

The Chicago and Southeastern railway employees struck yesterday for back pay. Business is suspended over the entire system.

When the striking shipmen announced their intention of obeying the law and committing no depredations against the company's property last night the officials of the road believed them and the property was left unguarded. It proved to be a grave mistake, for at 3 o'clock this morning the caboose truck, located at the west end of the yard and adjoining the shops, was discovered to be a mass of flames, regardless of the prompt response and heroic efforts of the department.

Every caboose in the yard was destroyed and it was with great difficulty that the shops were saved.

A Depot Building Burned.

Word has been received from Westfield a station twenty miles east of here, that the depot at that place, together with a large amount of freight, went up in smoke.

The fires are undoubtedly the work of incendiaries and the company's officials says it is the work of the strikers or their sympathizers.

The condition of the strike is unchanged. Not a train passed over the line today.

Frank C. Reagan, the company's attorney, has received advice from the general offices to spare no expense in investigating last night's fires and he now has a corps of men working on the case.

He had a conference with the men last night and says they are not being mobbed. He refuses to say what, if any, clues he has to the perpetrators.

What the Strike Leader Says.
James Kennedy, leader of the strikers, a jubilant tonight. He says the men had nothing to do with last night's fire, but that they are the victims of the engines being fired with wood.
It is rumored that the trainmen will be asked to make an adjustment of the difficulties is reached tomorrow.

TO OVERTHROW CAPRIVI.
Combination Formed with That End in View.
London, February 2.—The Berlin correspondent of The Times telegraphs that the agrarian, conservative and Bismarckian parties have entered into a scheme to overthrow Chancellor von Hohenlohe, who does not favor the emperor's

proposals for increasing the naval armaments of the empire. It is plain that the chancellor's position has been weakened, but the coalitions hope to overthrow him is based on the emperor's energetic temper and his insistence on the maintenance of the status quo. Count Waldersee or Count Wartenleben, mentioned as Chancellor von Hohenhausen's successor, but their names are not mentioned in the press. The use of a candidate's name would jeopardize the scheme. It is believed in some quarters that the real candidate of the coalition is Count Waldersee, but the Emperor's correspondent adds, perhaps the suggestion of this name is made by friends of the chancellor in order to defeat the scheme by connecting with it a name which is distasteful to the emperor.

SUICIDE OF A WEALTHY WIDOW IN BROOKLYN YESTERDAY.

Brooklyn, N. Y., February 2.—Mrs. Augusta Schwartz, a wealthy widow forty-eight years of age, residing at No. 119 Berkeley place, committed suicide today by shooting herself in the mouth with a revolver. Mrs. Schwartz has been depressed by the death of her husband.

endent shortly after death of her husband on December 24th last. He was a 40-year-old, well-to-do, successful businessman, a member of the Bronx Athletic Club, a wealthy member of the Bronx Country Club, and a member of the Y. M. C. A. Schwartz was an up-town flat in New York City. He was married and had a large estate which he left to her life. Death was instantaneous. The coroner's jury found that she made deliberate preparations to kill herself. She attached tubes to the gas jets in the room, and other ends of which were placed on the bed. An empty bottle which had contained two ounces of laudanum was found on the mantelpiece and it is believed that

swallowed the contents. The room
filled with gas which had escaped
from the open burners.

FARMERS' INSTITUTES

Be Held in All North Carolina Counties.

Wilmington, N. C., February 2.—(Special.)—
The agricultural department will this
week begin a long series of farmers' in-
stitutes. These will be held in each of
the seven counties in the first congressional
district.

Mayesville last night, Ferdinand
Smith, colored, walked into James Horne's
room and was disorderly. He was
arrested but refused. An altercation

several Methodist churches in North Alabama services were held today in memory of Dr. Atticus B. Haygood. The executive committee of the trustees of the colored State Agricultural and Medical college decided that the board meet February 21st to investigate charges of gross immorality which identify Crosby and Professor Dellinger against each other.

The executive committee of the state far-mer-alliance has ordered that the shoe factory at Hillsboro be at once equipped with machinery.

"Whited sepulchre" called "senatorial dignity." The powerful pomposity which bore the name was the more so, because it has ever flourished in America of English aristocracy, lordliness, etc., and I hope it will be killed. I saw, in Jefferson, Jackson and such patriots knew none of it. It has been the only thing which would have answered or applauded him. When a senator says another is "a dog," he is a blackguard, and is summarily executed, for no man can be a dog; therefore the charge is most billingsgate, and cannot be answered. But when a senator says another is a "besotted tyrant," it may or may not be answered, and is answered, and is disproved, for silence gives consent. Why not let some senator defend our president and our party? Is it possible that a parcel of superannuated masculine-maids can so much as think of making the men trembly dumb? Oh, for a Webster!

ABOUT GUATEMALA.

TRAVELER'S VIEW OF THE FA-
IS OF CENTRAL AMERICA.

ket places of all Spanish America are ways interesting; but what struck me as a decided Spanish-American novelty is the fact that in the market was the fact that the policemen were armed with revolvers far as any one could see. I had feared that no soldiers guarded the place when the passengers entered at night, and that there were no soldiers seen at the station along the line to the capital. That was novel, but to find policemen in the market was a novelty which I did not expect, but that the president had a command over his people little short of marvelous; for in the city of Mexico, in the city of Athens of Spanish America," and it really is properly so called, the policemen use swords.

The Ubiquitous Porter.

Next to the policemen in interest are the porters. No other city of Central America is supplied with public porters. They can be found at all business places, about the markets, hotels and other gathering places, ready to carry anything from a bunch of greens to a piano, to the passenger, the city or the nation, for a pay.

Some Very Peculiar English Phrases
a Landlady Spoke—Policemen
and Porter.

They called Guatemala city the Paris of
Central America whenever people who
were in the place were in the
region, says John R. Spears, in The
New York Sun. Even the natives of other
countries there, who were not lacking in
curiosity, did not seem enough
to excite a lively curiosity in any traveler.

But I gathered from what was said that when saying this they had no reference to the library or any Parisian collections of art works, unless, indeed, living pictures for private exhibition could be called works of art. I understood that the artist was a man of wealth and leisure and a knowledge of the art of entertaining travelers. It was said to be a very many years ago, in a city in which it had a race track with pretty

the pottery makers. They come in the morning and leave in the afternoon. The frame crates (say six feet high and near two feet square on the bottom) supported the jars as they were being packed. Each of these crates was full of crockery—water jars, as a rule. I saw one that was so heavy that I was just able to lift them, but the person carried them at a swift trot for several miles an hour over the country roads. The

and the word "Huspedes" over the door. I was soon hearing a loud rattling noise. A driveway led to the court, and when I had gone in I found a tame coon sitting on a small table in the center of the room. Those two were wrestling in the most vigorous but friendly fashion in the world. I was about to go out when I had watched the play for a minute the pup got up and ran to the door. I was startled and I looked out. A large, white, shaggy animal, and I discovered the stranger. She made a dash for the door, and I opened the window and saw her go. I was very much surprised.

[illegible]

could be—but, of course, a traveler as truthful as that what she knew of Elah she spoke with a pure American accent. And surely the telling on the fact that it illustrates somewhat the phase of life in the tropics.

Embrodery.

In an article on the progress of Spanish America, in *The Sun* some time ago, reference was made to the remarkable embroidery of the country.

The Memphis *Commercial Appeal* owns a bridge at Florence, Ala., which was made before the war, and which is charged on the bridge with the embroidery, facilitating the crossing.
